News of Mine, of Prospect, of Furnace and of Mill.

MILLIONS OF BRICK FOR NEWHOUSE

Campaign of Construction on the Way-Furnaces a Matter for Future Consideration.

With which to begin the active creation of a mining camp, the architecture of which promises to excel any yet attempted in the West, there was yesterday awarded Ernest Yunk for use upon the new town of Newhouse, out of Frisco, a contract for five million brick, the order to be discharged as early as it is possible to accomplish it. The campaign of construction, said Mr. Newhouse, will begin upon the hotel and boarding-house, for which plans are now in the hands of his architects, these structures to be as stately and as enduring as any in the diggings, while following them will be the work on fifty dwellings for the accommodation of those who shall find employment at the Newhouse mines and concentrator, rallway and smelter. To provide delivery of this and other material the management is assured of equally energetic endeavor on the part of the San Pedro's forces, while Joseph Dederichs, the superintendent of construction, will give to it his undivided atten-tion, that the improvement of the camp may be advanced as rapidly as possible the present season.

Discussing a bulletin from the East

that he had decided to add furnaces to other equipments at the new camp and that with these he would reduce the high-grade ores to a high-grade cop-per matte, Mr. Newhouse said that while his contract with the American Smelting and Refining company gave him this privilege, it would not be exercised until it was manifestly to the interest of all to do so. Certainly no provision has been made for furnaces

The purpose of his visit to Colorado at this time is to be present at the reor-ganization of the Denver, Lakewood & Golden railway, which is being sold un-der an order of court for the benefit of the bondholders, of which Mr. New-house is one of the more prominent. The line now connects Denver with Golden, the pretty home of the Colorado school of mines, and is to be extended to Idahe Springs and points west. The presidency of the reorganization has been tendered Mr. Newhouse, and upon the adjournment of the meeting he will re-

THE MONARCH

The Tribune has been advised that wires were received yesterday by Col. Altman, and also by Mr. W. H. Alexander, that consolidation matters in connection with the great Monarch and Majestic companies were progressing finely, and that a harmonious situation all around was coming to prevail. This will be encouraging news for Utah people, for the topic has been one of considerable anxiety, and is still being generally discussed. The Tribune understands that the Monarch company s already an assured fact, and people hereabouts will be glad to see the fine properties of the Majestic company in-cluded in the combination, thus rounding out a very valuable and promising group of mines and smelters. It is pretty generally understood that the big combination will include the famous Pioche Con., from which so many millions were taken in earlier days, and in which competent experts report other millions already blocked out; the Manhattan, that other Pioche combination which Ed F. Freudenthal has been exploiting for several years; the Imperial, Beaver county, Utah, whose great deposits have been foreshadowed for the last twenty years; the Comet, directly adjoining the new famous Cac-tus properties of Samuel Newhouse; the Massachusetts patented claims; the Last Chance, with its concentrator, at Bingham; certain large and promising coal properties; the Montreal and the Majestic group, with its fine equip-ments, smelter and water power. There is a 300-ton smelter at the Ploche Cor recently enlarged and put in good op-erating condition. At this writing the financing of this stately combination on an ample scale is practically assured, and, unless some unexpected obstacles intervenes to check proceedings, it is not too much to expect that within a few weeks all details will be commost prominent bankers in New York will be president of the Monarch com the board of directors will be an unusually strong one.

DON MAGUIRE AND HIS LATEST PROJECT

A letter from Don Maguire, president and general manager of the Napoleon and Maghera Copper Mining and Reduction company, launched recently with a capitalization of \$1,000,000 and with the Napoleon and Maghera groups, consisting of 240 acres of mineral-bearing territory in Sierra Madre mining district, Box Elder county, twelve miles north of Ogden, says work is to be prosecuted most vigorously and that the best contained in his long years of experience will be devoted to the undertaking. Telling of it, Mr. Maguire

years of experience will be devoted to the undertaking. Telling of it, Mr. Maguire says:

"The sources of metallic enrichment in this property consist of two lodes, or copper-bearing fissure veins, the one passing through the group for its entire length of 5000 feet. This is what is known as the Napoleon and Maghera lode, passing through the Maghera, Tugela, Napoleon and Maine claims a distance of 5000 feet, with an average of ten feet at the outcrop for 5000 feet, and through the last 1600 feet of distance this vein will average twenty feet in width.

"Along with the Napoleon and Maghera lode, there is the Prince of India copper lode, which runs through this group for a distance of 2000 feet, with an average width of ten feet the entire length of its outcrop within the confines of this property, and these two lodes in their eastern course fuside the contines of this group join a contact vein, known as the Contact copper lode, that runs across the St. Dominic, Mary and Maine claims a distance of 1800 feet, thus giving a lode measurement of 10,500 feet in length within this property.

"The metallic values of these three lodes

of 11 to 22 per ton and from 1 to 4 ounces | THE TRIBUNE NEWS STANDS | LINE-UP OF THE of \$1 to \$2 per ton and from 1 to 4 ounces of silver per ton."

The copper lode has been prospected to depths of three to ten feet along its entire distance. The ore exposed is quite extensive, "the situation of the vein being such that it can be opened to a depth of more than 2000 feet." While the ore may be delivered by pack-trail a distance of half a mile to Bonneville on the Oregon Short Line, an aerial tramway for the transmission of 100 to 200 tons a day to the foot of the hill will cost but \$15,000. "An there is a large percentage of the output of these mines requiring concentration, a null for that purpose must be provided, which will require an expenditure of \$20,000. In the development and opening of these mines to the point of ore slipment to market, a conservatively high estimate places the cost at \$15,000. Thus we see that our group of copper mines requires only \$50,000, exclusive of the fitting up of the property with such features as buildings, tools, machinery and other essential wants of the property, making in all a demand for \$55,000 to equip the mine to the point of heavy production."

The friends of Mr. Maguire and his associates wish them all kinds of success in the undertaking.

WEEK OF INACTIVITY IN THE LOCAL PIT

The week's trading on the mining exchange was confined to \$4,133 shares of stock, for which \$31,628.40 was paid, the day's business to \$450 shares, that brought \$4130.50, the close with everything weak and inactive. With the proverbial exceptions, the week was one of declines. Although Daly West was advanced to \$37 on the announcement that the regular dividend of \$17,000 was to be paid on Friday next, it fell back to \$5,50, on which figure it is affording the investor better than 30 per cent, yesterday, while Grand Central was, during the day, reduced to \$1,55, or to a fraction under 30 per cent per annum on the investment. Century, which is at present earning its adherents 2 cents a month, was handled with unprovoked severity in the face of the spiendid report by Manager Madsen on the physical condition of the mines and the efficiency of its plant, nor was the treatment inflicted on Con. Mercur, which changed hands at \$3 cents around the close, any less cruel, considering its equipment for an increased output of gold. Sacramento, paying regularly 20 per cent on shares at 20 cents, closed with but 17% to be had for it, while Silver King, which was passing 'round the usual dividend of \$160,000, was an offering at \$65, while the best to be had for Horn Silver, which is distributing \$80,000 a year, was \$1. Eagle & Blue Bell continued weak and inactive, although its output is promised a material output the present month, while Tetro, with its surplus filling up hourly, marked up a loss of 3 cents during the week. Butler-Idberal recorded steady gains, as did Uncle Sam, while Montana of Tonopah suffered locally from punishment that was being visited upon it in San Francisco. Ontario, with favorable reports from the new mill, was neglected throughout, and closed an effering at \$5, while all the market would concede to Daily was \$2.00, with \$4.10 hid for the Judge. New York showed itself capable of a little better behavior, while Utah of Deep Creek, which continues to come to market with a most desirable ore, closed an offering at \$6 cents, with but \$1.50 asked for Buillon-Beck, the day and week closing on the following market: eptions, the week was one of declines Although Daly West was advanced to \$37

BOSTON CON. DIRECTORS AND PROPOSED PLANT

Confessedly enthused by conditions at the Boston Con.'s Bingham mines, Messrs, Frank A. Schirmer and E. E. Abercromble, Boston representatives in the company's official household, departed for the East yesterday, promising to return at a later period in the season, and when they may revel in the waters of the lake without re-course to sealskins. The wealth that has been added to the Boston Con.'s resources, the equipment which has been installed for the economic extraction of its ores, the case with which the present contract with the valley smelter is being compiled with, and the manner in which unexplored territory has responded to the blast of giant since last October, when the properties were inspected by Mr. Schirmer, have been a revelation to him, and with these assets being hourly added to, he tees nothing to antagonize results as big as any achieved in the camp of copper. Mr. Schirmer went away a more fervid advocate of a smelter than when he came, and, with means with which to construct, he sees nothing to occasion delay. In this Director Abercromble was equally urgent, while President Newhouse, who is accompanying the visitors as far as Denver, and who will return to Salt Lake on Thursday next, says an ultimatum wil have been reached before they separate in Colorado. He did concede that the American members of the board are working in perfect harmony, and inti-mated that he had no desire to oppose the majority.

The visitors made many friends in town and at camp, who will await their return and tidings from the pro-

WEEK'S CROP OF ORE AND BULLION

In the ore and billion market the week closed on settlements amounting to \$441,700, this compared with \$355,200 for the previous one, the gain a feeble reflection of that of which the diggings are capable with improved roads and facilities with which to reach the mar-During the same period there d from the copper furnaces to the refineries of the East 737,-655 pounds of coper bullion, containing gold and silver of a value exceeding

matte in which was contained 175,000 pounds of copper.

The day's settlements in the open market amounted to \$62,900, McCornick & Co. reporting them as they follow: American bullion, \$28,700; gold bullion, \$9700; gold, silver, lead and copper ores,

In the metal market silver ruled at 53% cents an ounce, lead at \$3.50 per hundred pounds, and casting copper at 12% cents a pound.

MR. KIMBERLY RETURNS FROM TWIN FALLS

While there have been some delays in the vast amount of work undertaken by the Twin Falls Sand & Water company, they are not beyond the normal, said Hon. P. L. Kimberly on his return from Idaho yesterday, and with the assurance of the engineers that they may be overcome, it is not difficult for the management to take them resignedly. The work will be prosecuted with no less endeavor, however, and the waters by which another empire is to be made to blossom in the West turned into it as soon as human energy can

Mr. Kimberly, who was accompanied by Walter G. Filer, general manager of the company, will remain in the State at least several days, and while his movements had not been decided on yesterday, they will probably include a visit to the Annie Laurie and another inspection of the Honerine.

From the latter Manager Willard F. Snyder returned last night, after initiating a large party of friends from

Silver King's Wealth Again in Evidence-South Swansea Reaches Into Its Stocking.

Shareholders of the Silver King are

reveling over the presence of another

\$100,000 dividend, this a total of \$400,000

since January 1st last, with a grand

aggregate to date of \$7,725,000, without

reference to the robust condition of its

treasury or the tremendous assets under ground. To each, indeed, additions are being made as regularly as are they to the resources of those who participate in the monthly menu, while it is certain that the physical conditions of its mines at Park City were never so gratifying as are they today. A reso gratifying as are they today. A re-port from the East says it is quite well understood there that Mr. Sweeny of the Federal Lead company, whose name has been exploited in connection with an endeavor to purchase the King, is to leave for Utah the present month. accompanied by at least one of the members of his staff. The same au-thority insists that it was the intention of Mr. Sweeny to visit the properties during the presence of President Keith in the State, but that the heavy snowfall had induced him to cancel the arrangement. Meanwhile President Keith is at Los Angeles awaiting, it is said, the convenience of Mr. Sweeny. The South Swansea of Tintic will make its reappearance in the dividend column on April 25th, when a distribu-tion of \$3000, or a cent a share, will be made, and while it did not come with the first day of the month, the surprise is none the less a surprise, nor is it any the less agreeable. The payment of this sum increases the total dealt out by the South Swansea since its exploitation was begun to \$257,500, and while the decline in silver has been to its digadvantage, two sets of lessees are making it possible, by observing every rule of economy, to continue the production of ore. Two more lots from these sources are now at the sampler and will be on the market tomorrow said Secretary Farnsworth, and while the earnings are not as munificent as have they been in former years, there are no wolves at South Swansea's door. The transfer books of the Daly West

HEAVY TONNAGE OVER THE COPPER BELT

of Park City closed on its April divi-dend of \$117,000 during the afternoon, payment of it to follow on Friday next

With two locomotives in commission the management of the Copper Belt railway at Bingham is again approaching "the record," and with the patrons correspondingly contented. During the day's shift there was forwarded from the bins of the Boston Con. to the furices of the Bingham Con. smelter a half-dozen carloads of ore, while seven carloads from the Utah Copper com-pany's mines were delivered at the mill, ow running without interruption, although on "short feed" yet. From the Columbia group of mines to the Ohio company's mill two carloads were whisked over the rails, with an equal number from the Commercial group and the Yampa. With which to in-crease the output, the management is promised a third engine, which has been undergoing repairs at Silver Bros. on Wednesday next, while a fourth is now on the way from the locomotive works at Lima, O. With these ma-chines in commission the producers along the route, said Manager Bayly, will be permitted to try out their sinews.

STAR CON. INTERESTS IN SPECIAL SESSION

A meeting of shareholders of the Star Consolidated Mining company was held in the offices of Capt. T. Egan yesterday afternoon for the purpose of discussing the proposition to equip its Tintle properties with a plant with which to chlorinate its ores, the conideration exacted by the proponents a half interest in its holdings. The chair was occupied by Capt. Egan, the secretary's desk by Harry Joseph.

The meeting developed a very pro-nounced opposition to the plan, as it had been communicated to the sharepolders, and after exhaustive discussion it was referred to a committee consist-ing of Prof. Marcus E. Jones, J. P. Turner and Henry R. Ellis, thresh ft out with those from whom the proposition emanates, confer with the shareholders and report back latter at the annual meeeting on Thurs-

In the discussion the Packard interests were represented by Secretary Packard, by whom the meeting was as-sured that his side was actuated solely by what it conceived to be to the inter-

ests of the whole.

Prof. Carmichael, who has long been identified with the use of chlorine in the recovery of the metals, was also a speaker, while in the general discusion many participated. However, the

A resolution was adopted that it was the sense of those present that all owning or representing shares in the company be permitted to take part in the annual meeting on April 14th. Until the committee is heard from ent has been practically

A BRISK WEEK IN CAMP OF COPPER

The Bulletin, reviewing the week at Bingham, says: Nothing so important in the history of Bingham has transpired as the operations of the Utah Copper company, demonstrating, as they have done pany, demonstrating, as they have done and are doing, that the thousands of acres of mineralized perphyry within the district not only contain copper of substantial commercial value, but that the material yields to simple methods of treatment. The Utah Copper company's Ringham enterprise is at once a success of farreaching importance, for it sets an example that will be followed by other powerful corporations yet to be organized to operate similar ground.

The &-horse-power engine for the New ment. The Utah Copper company's Bingham enterprise is at once a success of farraching importance, for it sets an example that will be followed by other powerful corporations yet to be organized to operate similar ground.

being put in shape to make a considerable
output this summer. output this summer.

Operations have not been resumed in the Mascot tunnel of the Dalton & Lark, but are liable to be the coming week. Present daily shipments from the Bingham Coninclude 150 tons Dalton & Lark and Brooklyn, 50 tons Fortune and 200 tons Commercial. Everything is moving smoothly at the several mines, and a prosperous year is indicated.

ANOTHER DECISION IN PORTLAND SCRAP

OMAHA, Neb., April 9 .- A special to the Bee from Des Moines says: "The decision of the District court at Council Bluffs, in the case of James Doyle against James F. Burns, president of the Portland Mining company of Crip-ple Crock, Colo., was today reversed by the Iowa Supreme court. The decree of the lower court gave Doyle \$449,992, together with \$8000 interest and \$8000 The case became famous by a suit filed, in which Doyle claimed near-ly \$1,000,000 in payment for his interests in the Bobtail, Tidal Wave and Devil's Own claims, which form part of the Portland company's properties. The suit was instituted in 1898, and judgment was rendered for \$717,000, Burns permilting the suit to go by default. This judgment was later set aside on show-ing made by Mr. Burns after Doyle had spent six months in jail for con-tempt of court, which had ordered him to discontinue proceedings in Iowa, but which Doyle refused to do. The trial at Council Bluffs was made famous be cause of each side using a corps of de tectives to watch witnesses summoned to testify in the case. The veredict reached in that trial was the one which was today reversed by the Supreme

READY TO EXPLOIT

BINGHAM BONDS

For the purpose of funding the floating debt of the Bingham Consolidated Mining and Smelting company the ties and holdings of the company for \$1,000,000. At a meeting of the directors held recently it was decided to borrow a million dollars, that being the only means by which the objects of the corporation can be attained.

A mortgage has been given to the Federal Trust company, and the Bing-ham company will issue first mort-gage, 6 per cent, gold bonds, bearing date of April 1, 1904, and maturing April 1, 1914. The property mentioned in the mortgage, filed yesterday in the office of the Count Recorder, includes twenty-six patented claims in Bingham, West Mountain mining district, a part interest in other propertiess and the mill sites, machinery and power plants of the company, including the smelter in Salt Lake valley. The bonds will be disposed of only as the needs of the company require.

MANAGER WHITLEY AT HOME AGAIN

That the American Smelting & Refining company proposes to abandon the construction of a copper plant with which to reduce ores of that class in Salt Lake valley because of any agree ment to exchange ores with the Bing whatever, said Manager C. W. Whitley on his return from Montana yesterday. On the centrary his information is that the mechanical engineers are yet work ing assiduously on the plans for it, and that it will be built as exploited by the has no reason to believe other.

During his absence Manager Whitley spent much of the time at the Helena melter, where Frank Smith, agreeably recalled by producers as a former as-sistant manager of American interests here, is now reducing pearly 29,000 tons of ore monthly. White conditions for some months in Montana have been quiet, Mr. Whitley reports them steadily improving.

RAYMOND-ILLINOIS READY TO RESUME

The articles of incorporation of the Raymond-Illinois Mining company ere Raymond-Illinois Mining company sre
now ready to go on file, the company
having a capitalisation of \$400,000, divided
into as many shares of the par value of
\$1. John C. Sullivan is designated as
president; J. D. Wood, vice-president;
John C. Lynch, secretary and treasurer.
With these officials Senator Thomas
Kearns and J. W. Wheeler will serve as
directors. Operations at the properties
located in Tintic will be resumed at once,
said President Sullivan yesterday, the
search for ore to be continued on the
500-toot level, which will be extended south
to intercept known bodies. The outlook
is most assuring. is most assuring.

Tonopah Stock Sales. Thursday's transfers on the Francisco board were recorded as they

follow: Montana-Tonopah, 600 at \$1.35 and \$1.37\\(\frac{1}{2}\): 200 at \$1.42\\(\frac{1}{2}\), buyer sixty days; Midway, 900 at \$7 cents; North Star, 200 at 32 cents. Mining Notes. General Manager MacVichie of the Bingham Con. left for camp again yester-day merning.

A streak of high-grade copper ore is be ing followed on the 1400-foot level of the Black Jack at Mammeth. sion many participated. However, the matter was referred to a committee to Euckhorn group at Ophir, is in from camp to get acquainted with the management. Another lot of lease ore from the Mam-moth of Tintic was sold yesterday on controls shewing 12 per cent copper, \$2.40 gold and some silver.

W. A. Scott, Western representative of the Engineering and Mining Journal, left for Idaho last night to interview the bonanza kings and prospectors of that presperous commonwealth. W. D. Pypor, treasurer of the Utah and Nevada company, is down from New-foundland mining district, west of the lake. He reports a fine body of ore, a trial lot of which showed 33 per cent copper, with 17 ounces silver and \$7.50 gold

per ten.

The Oasis Gold and Copper Mining company, with a capitalization of \$250,000, and with the Copperhead group of mines in Drum mining district, will be filed at an early day. The organization of the new company was promoted by Jed D. Clive, who has been long identified with the group, which promises to add another active producer to Utah's array.

The Hanuapah Mining and Smeiting The Hannapah Mining and Smeiting company, with properties eighteen miles east of Tonopah, Nev., yesterday called upon the shareholders for an assessment

Refrigerator Time.

When you are ready for that new Refrigerator, there are some handsome new models here, which will surely interest you.
